GitHub | LinkeDin | Portfolio

Professional Summary –

Full-Stack Web Developer with experience in building scalable, data-driven web applications and dashboards. Strong interest in Business Planning & Development, with the ability to support corporate decision-making through data visualization, automation, and analytical tools. Eager to gain hands-on exposure in a corporate business environment.

Experience –

AetherZen – Website **09/2025 – Present**

FullStack developer **Remote**

- Supported planning and decision-making by developing internal tools and data-driven features.
- Worked cross-functionally to understand business requirements and translate them into technical solutions.
- Collaborated in an Agile team to gather requirements & deliver technical solutions.

Projects –

1. Bookify – (Business & Product-Focused Solutions) Live Link | Client Side | Server Side

Role: Team Leader

Key features: Improved user engagement and decision-making through AI-driven summaries and advanced filtering.

Technologies: Next.js,TailwindCSS, Shadcn/ui, TanStack Query, Gemini API, Framer Motion, JWT, Express.js, MongoDB.

My contributions included:

- **AI Summary**: Developed AI-generated book summaries using Gemini AI.
- **Voice Search**: Enabled voice-based search functionality, enhancing accessibility and ease of finding books.
- **Advanced Filtering**: Added advanced filtering options to refine searches by criteria such as genre.

2. nextEvent – (Business & Product-Focused Solutions) Live Link | Client Side | Server Side

Role: Team Player

Key features: Supported business revenue flow through premium events, payments, and role-based dashboards.

Technologies: Next.js, TypeScript, TailwindCSS, Shadcn/ui, Express.js, PostgreSQL, Prisma, Next-Auth, JWT.

My contributions included:

- **JWT Authentication:** Implemented a robust, secure, and fully integrated authentication system using JWT tokens.
- **Profile-Management**: Enabled users to edit personal info, reset forgotten passwords, and change passwords securely.
- **Ai-Chat-Assistant**: Integrated AI-powered assistant allowing users to ask questions and receive instant responses.

Skills –

Business & Analytical Skills: Data Visualization (Dashboard) | Requirement Analysis | MS Office | SPSS | Smart PLS 4

Technologies: JavaScript (ES6) | Typescript | SQL | HTML5 | CSS | Node.JS | Express.Js | Next.Js |React.js | MongoDB | ShadCN | Framer Motion | TanStack Query | Git & Github | PostgreSQL | Prisma | Docker | AWS | Figma | NextAuth | Stripe | JWT

Soft-Skill: Leadership | Quick learner | Adaptability | Effective Time Management
